Ormeau Park in fast district.
 Sunday 12th August 1905.

Co. Down.

<i>Limax maximus</i> L.	Common at Oakleigh, all var <i>ferrusaci</i> . 1904.
" <i>flavus</i> L.	Several specimens in cucumber frames Oakleigh. Summer 1904.
" <i>arborum</i>	Rare on trees near Oakleigh. 1901.
<i>Agriolimax agrestis</i> .	Very common in garden, Oakleigh. 1904.
" <i>levis</i> .	Rare in Marsh near Oakleigh & in garden. 1903.
<i>Milax sowerbyi</i> .	Common in "Lilly of the Valley" beds in Oakleigh, 1902. ~~also common at other places~~
<i>Vitrea crystallina</i>	Fairly common in nettles at Oakleigh 1905.
" <i>cellaria</i>	Common in above situation & also in greenhouses.
" <i>alliaria</i>	Common in nettles as above & greenhouses.
" <i>radiatula</i>	A few specimens in nettles but rare.
<i>Eucomia flavus</i>	In nettles at Oakleigh but not common.

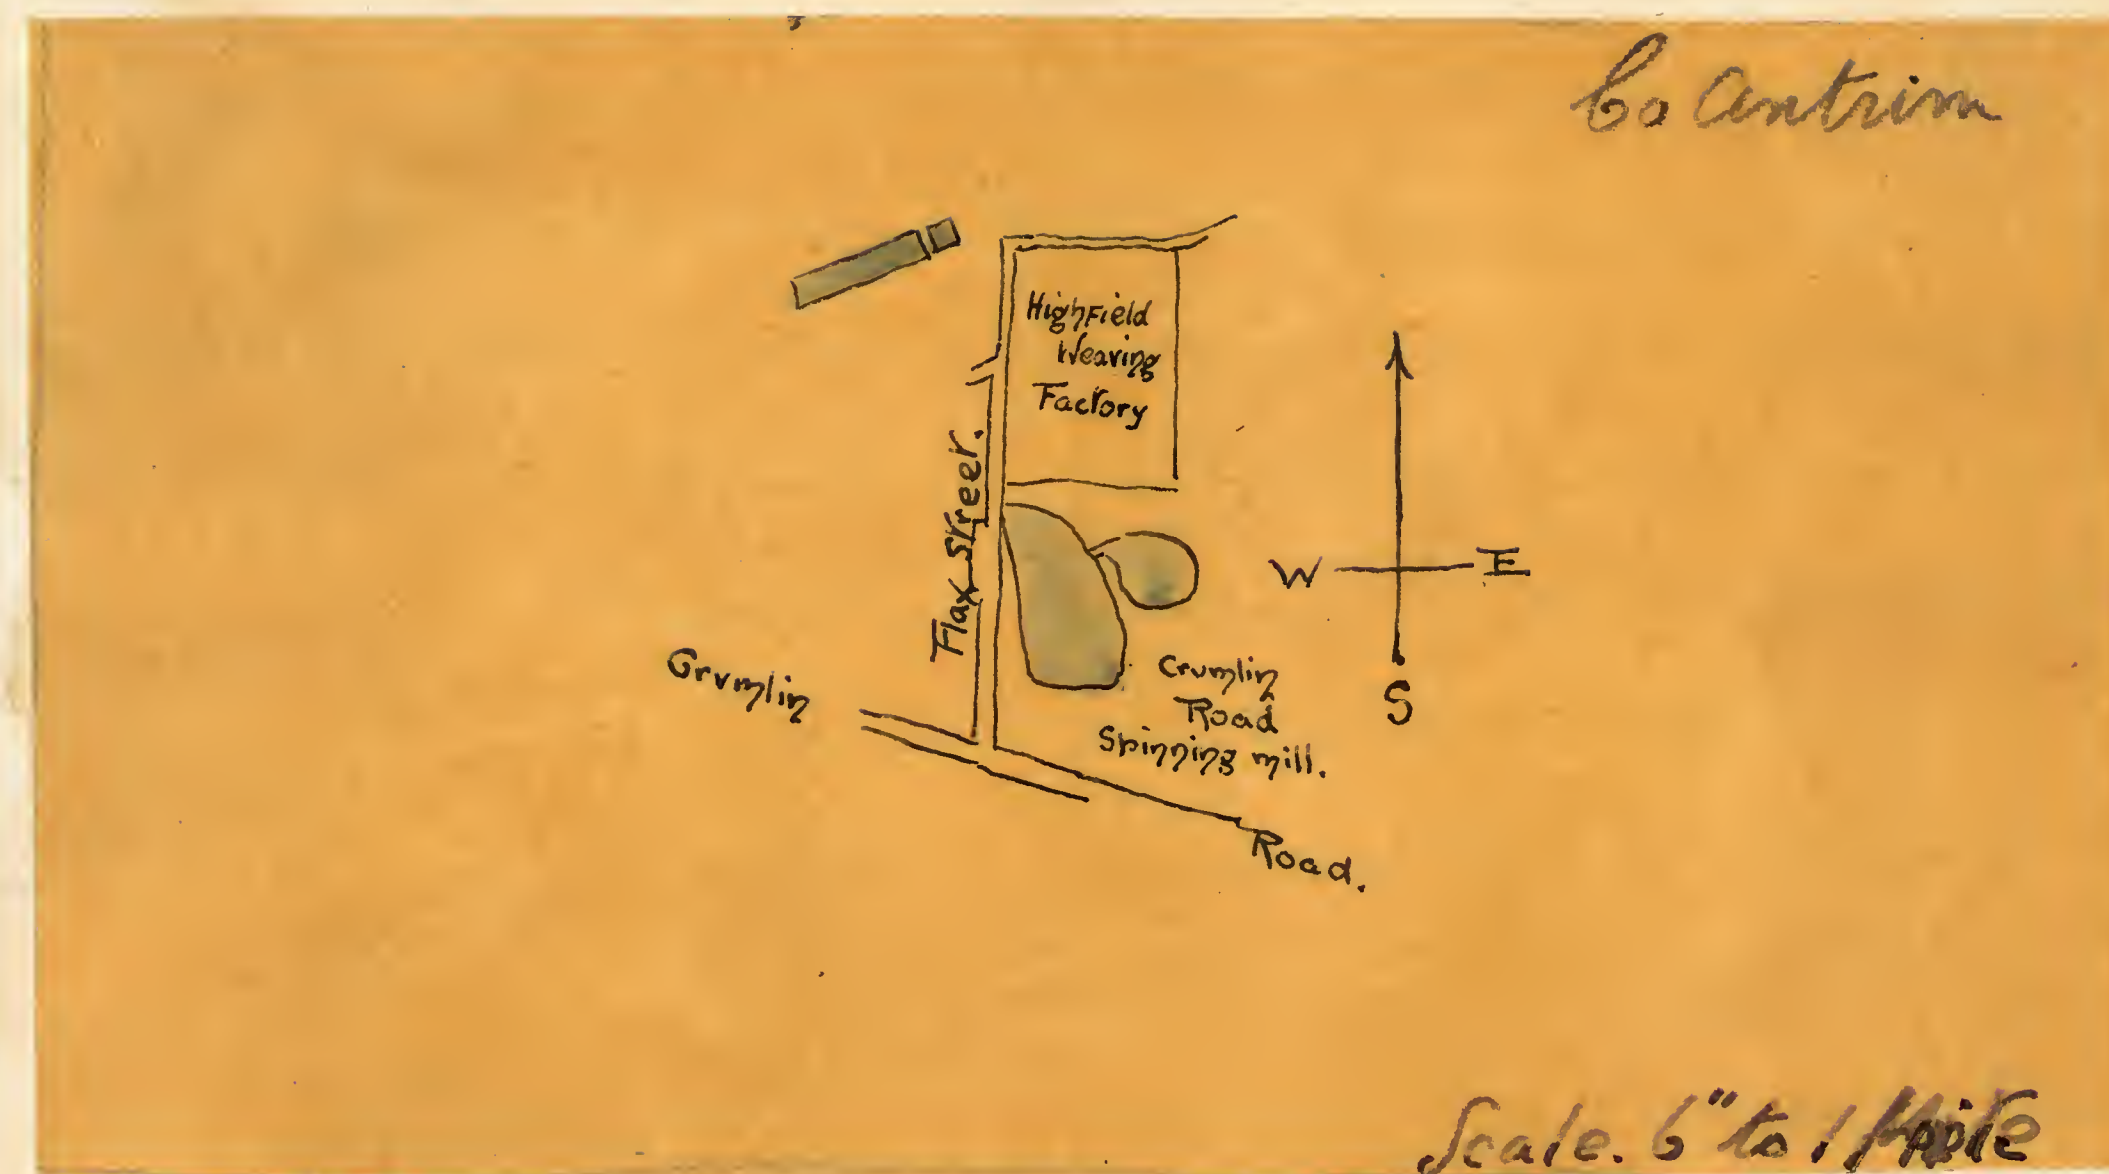

Ormeau Park continued.

- Arion ater* Very common. Type & vars. castanea + plumbea. 1905.
- " *subfuscus* Fairly common but not so plentiful as in previous years. 1905.
- " *intermedius* Frequent in nettles at Oakleigh. 1900
- " *hortensis* Very common in garden at Oakleigh. Almost a pest. 1905
- " *fasciatus* Also common in garden but not so abundant as *h.*
- Pyramidula rotundata* Common all round Oakleigh. 1905.
- Hygromia hispida*. Common in nettles at Oakleigh. 1905.
- Helix nemoralis*. Common at Ardenlee House in 1898. all var. subelliptica.
- Cochlicopa lubrica* Common at Oakleigh. 1905.
- Vertigo antivertigo* Several specimens in rejectamenta from Lagan 1904.
- Blausilia bidentata* Common at Oakleigh. 1905.
- Succinea patris* a few in ditch, Ardenlee Avenue. 1898.
- Limnaea pereger* Ravenhill Brick Pond & Ardenlee. 1898. One abnormal specimen at latter place.
- " *truncatula* a few in marsh at Oakleigh. 1901.
- Planorbis albus* Common in Ravenhill Brick Pond 1905.
- " *umbilicatus* Rejectamenta from Lagan 1904.
- " *contortus* Rejectamenta from Lagan 1904.
- Aplecta hypnorum* Common in ditch in Ardenlee Avenue 1898. This ditch has since been removed but *Aplecta* may still survive in similar situations close by. 1905. Specimens collected in 1898 were very large.
- Bythinia tentaculata*. Rejectamenta from Lagan 1904.
- Valvata piscinalis*. Rejectamenta from Lagan 1904.
- Pisidium pusillum*. Ravenhill Brick Pond 1898. also *P. nitidum*, *P. pusillum*, and *P. subtruncatum* in 1905. [A.W.S. 1916.]
- A specimen of *Planorbis* ~~cornea~~ was found in ~~do~~ ~~at Oakleigh~~ by C.V. Stevenson ~~also~~ with me. A.W.S. 1899

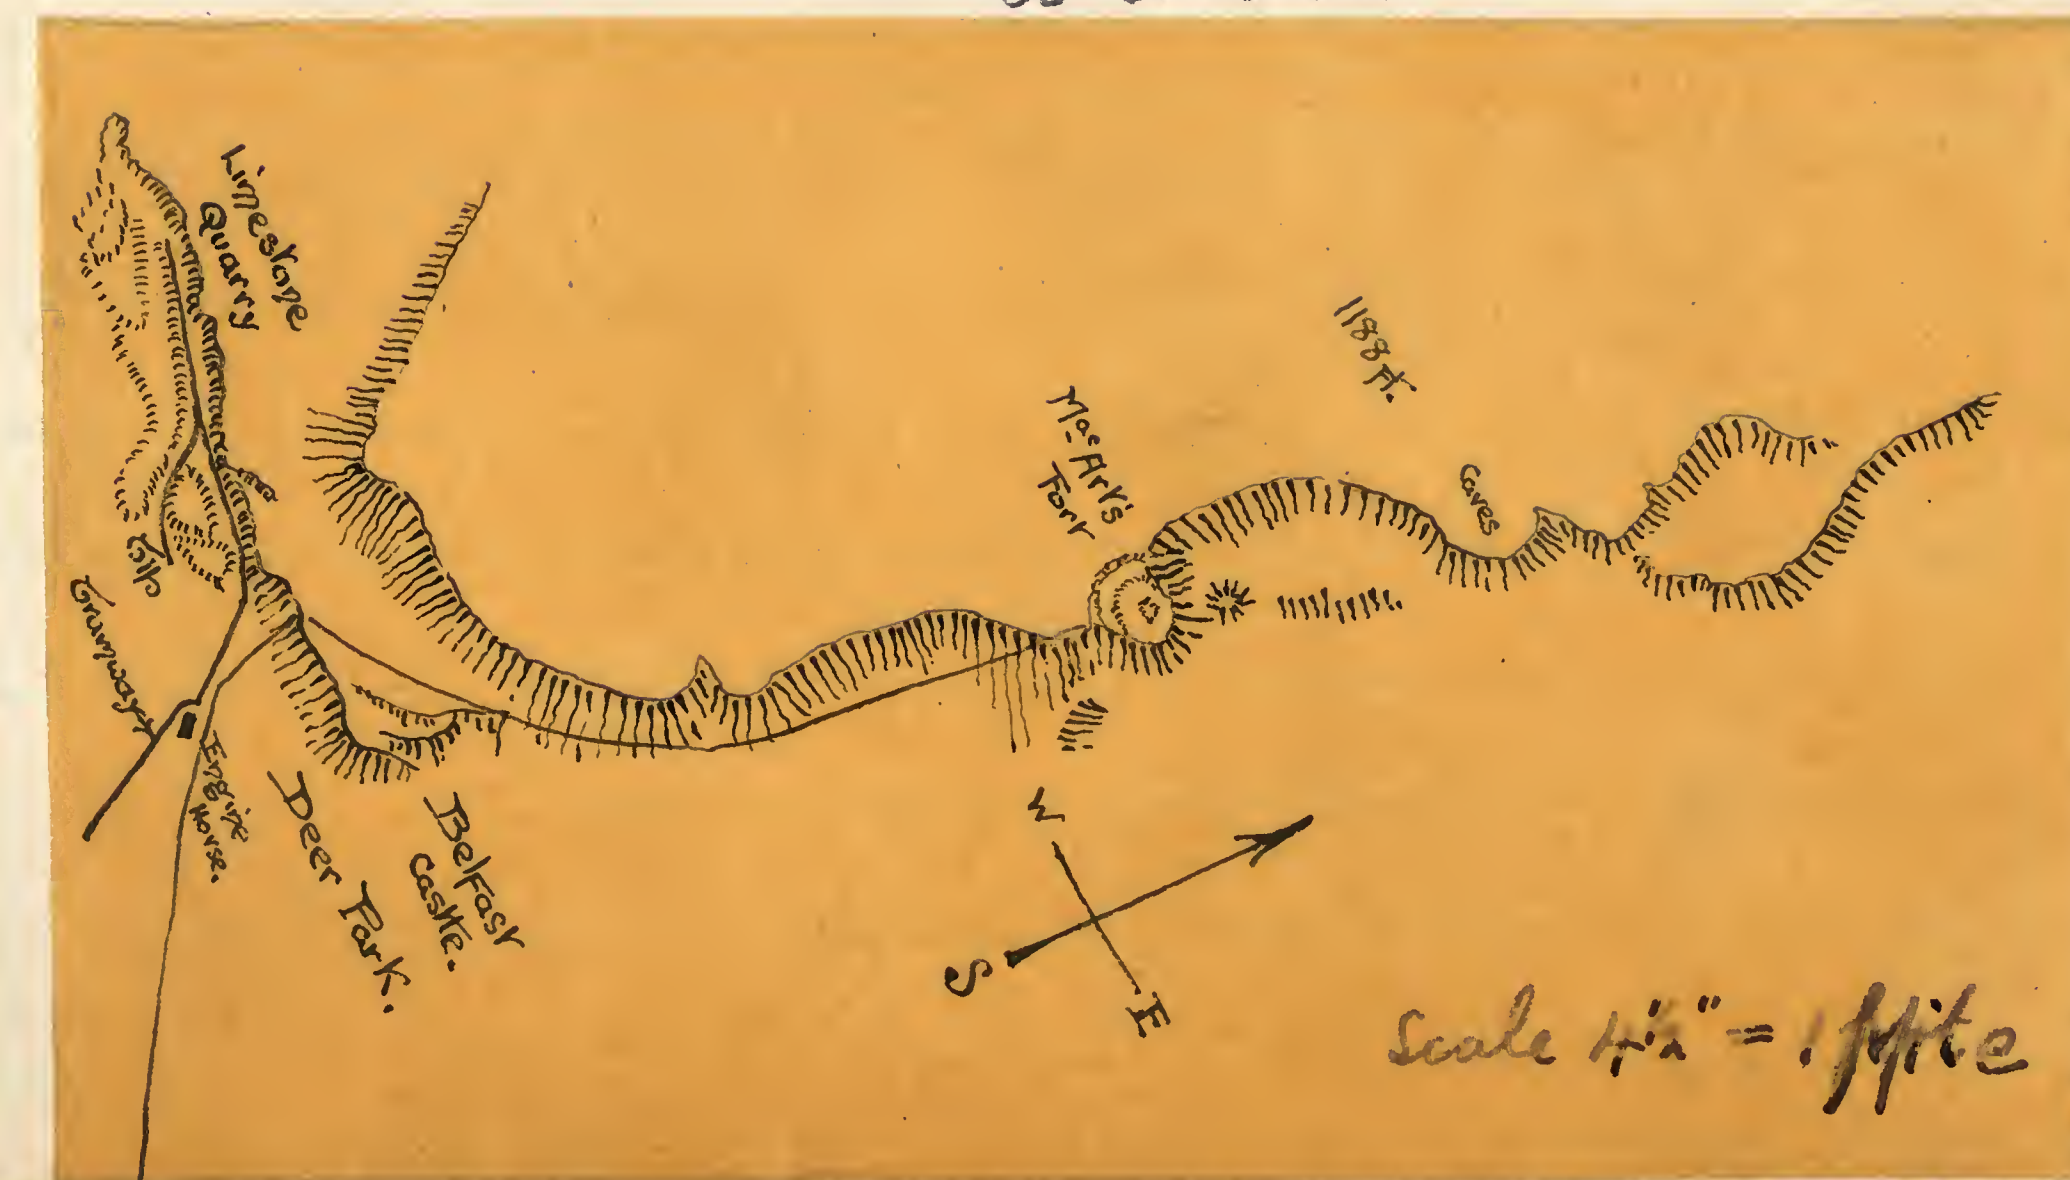

Vallonia striatella
excavated all
from Lagan at Oakleigh
in June 1900
A.W.S. 1916

Highfield Mill Dam.
Off Crumlin Road. Belfast

Co Antrim

A.W.S. + R.W.
7.8.05.

- Planorbis glaber* Very common but all dead. Largest specimen was 4.5 x 3.0 m.m. Temperature of water probably 100° Fahr.
- Limnaea pereger* Very common. Some specimens with very reflexed lips.
- Valvata piscinalis* One specimen dead. This & above were collected on 7th Aug. 1905.

Bare Hill
Co Antrim

Downpatrick cont.

- Arion ater* Common at Loop Platform. Vars *plumbea* & *castanea*.
" subfuscus Near Loop line.
" intermedius Common at Loop Platform.
" fasciatus Loop line.
Pyramidula notundata Common on Loop line, also near Wheat Hill.
Helix nemoralis a few at Loop Platform.
Hygromia hispida Plenty, young, near Loop line.
Bochlicopa lubrica Common on Loop line.
Jamnia cylindracea Wheat Hill, fairly common.
Vertigo pygmaea Two specimens at Loop Platform.
Blausilia bidentata Wheat Hill.
Luccinia elegans Type common with vars. *pfeifferi* &
Carychium minimum a few on Loop line.
Limnaea pereger Common in all ditches, also at Drumsallagh Pond.
" palustris Common in all ditches but a few very large in drain at Loop.
" truncatula Common everywhere. Drumsallagh Pond.
Planorbis albus Loop line & Drumsallagh Pond.
" umbilicatus Plentiful young. ? I think a mistake. G. W. S. 1914
" carinatus In ditch west of Loop line.
" spirorbis In field at Station.
" contractus Very common. also at Drumsallagh Pond.
" fontanus Fine specimens in ditch in Photo. also at Drumsallagh.
" crista One specimen near station in 1899. None in 1905.
Physa fontinalis Common everywhere & at Drumsallagh Pond.
Aplecta hypnorum In field near Station.
Acroloxus lacustris a few dead west of Loop line. Common at Inch Abbey in 1903.

Vallonia concentrica mounted
 collection taken at Downpatrick
 1899 by G. W. S. 1924.

Downpatrick cont.

- Bythinia tentaculata* Common. Everywhere.
Valvata piscinalis Common everywhere. Drumsallagh Pond.
" cristata Common everywhere. Drumsallagh Pond.
Sphaerium cornutum Very fine specimens near Loop line.
" lacustre In same situation as above & also a few very large in drain between Wheat Hill & Drumsallagh.
Pisidium nitidum Two specimens } [G. W. S. 1916]
" milium Common

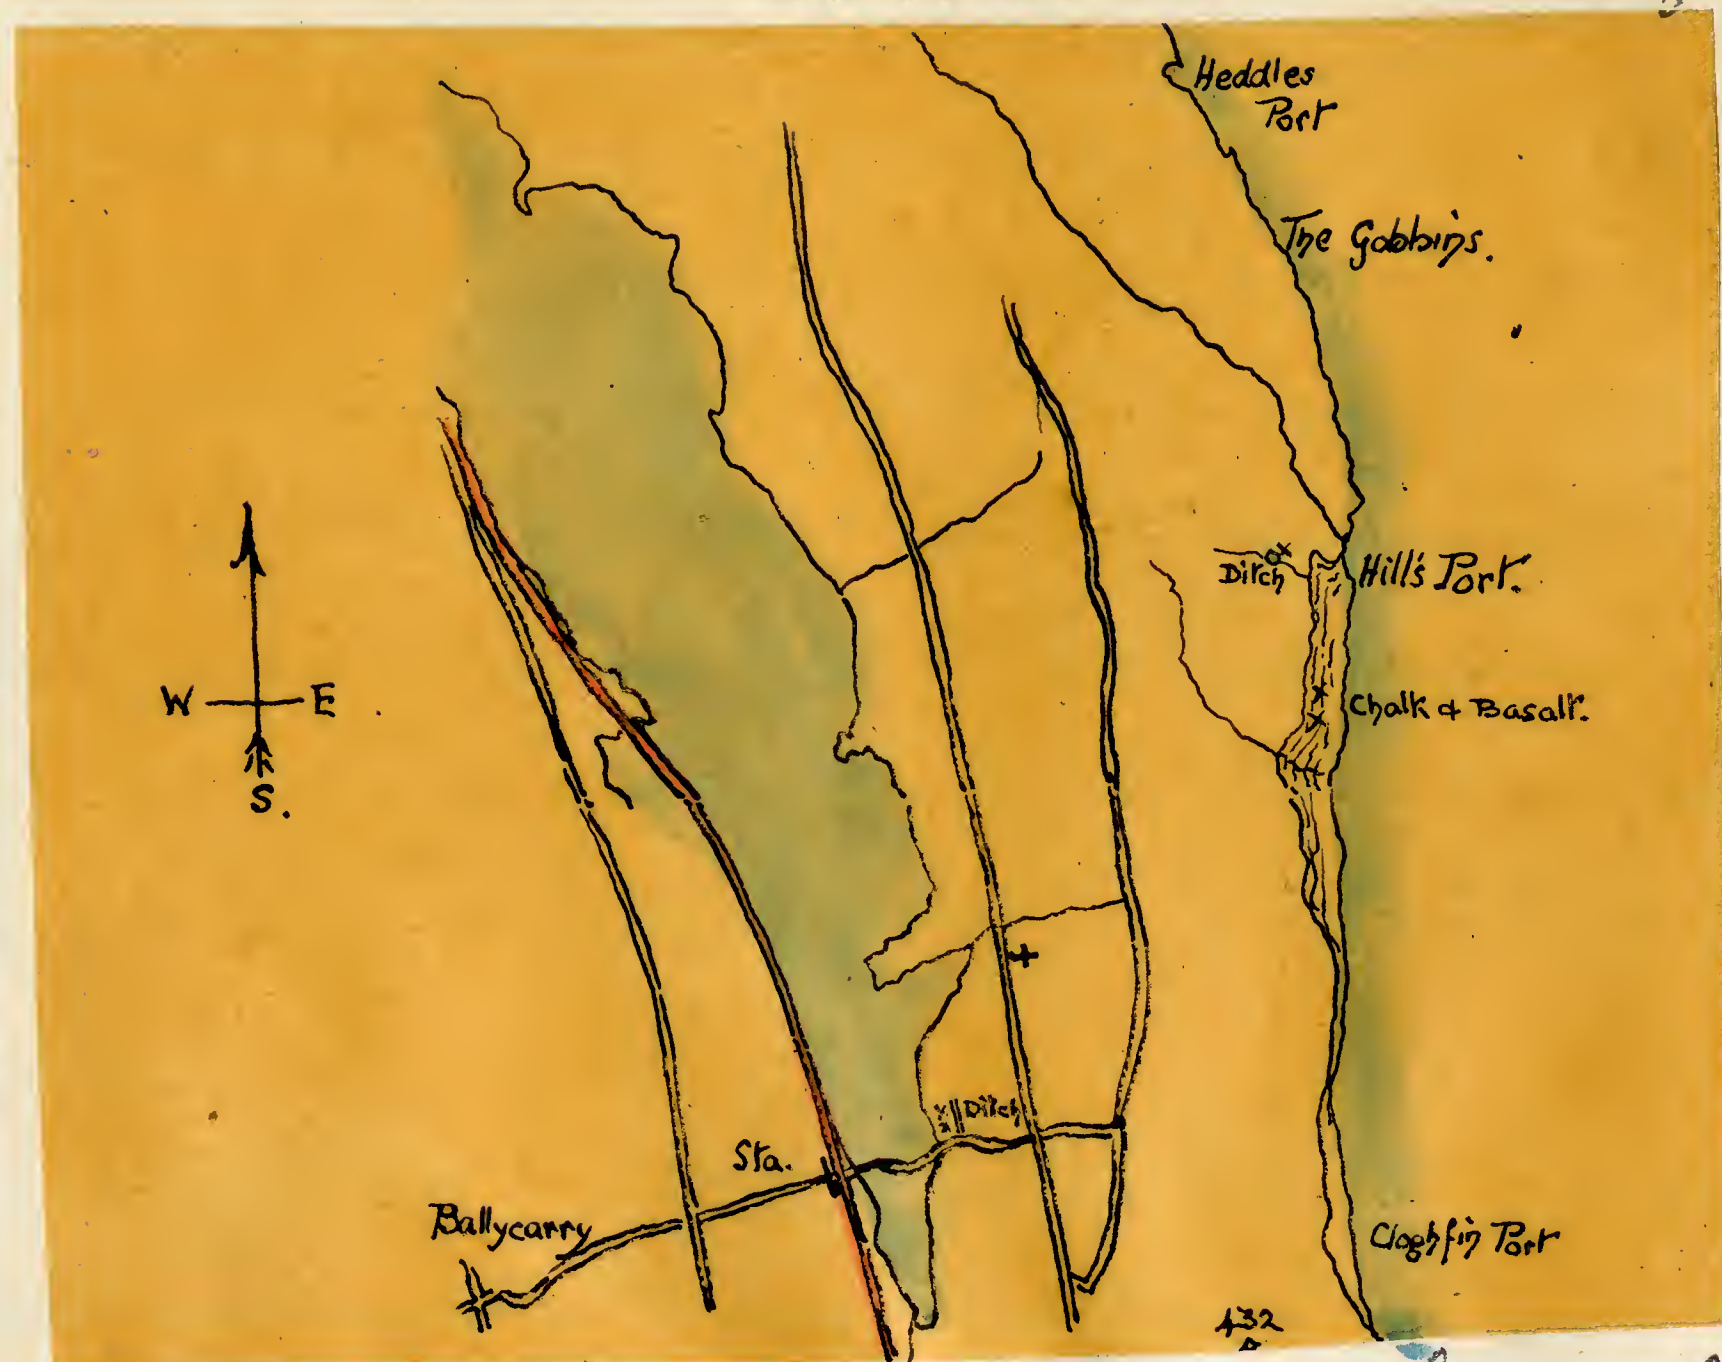

Marshes at Downpatrick.

- Ravenhill Brick Pond. See page I. 4th Sept. 1905.
Limnaea pereger Common
Planorbis albus Common & fairly large.
" fontanus One large specimen dead.
Pisidium nitidum } [G. W. S. 1916]
" pusillum }
" subtruncatum } See p. 2 ante.

Also *Planorbis*
nitidum & *lacustre*

Islandmagee.
to Antrim. 27th August 1905.

Scale 1 inch to 1 mile.

Hills Port on Cuttaceen

- Agriolimax agrestis*. at Ballycarry Ford & Hills Port. a few only.
Vitrina pellucida. a few dead on chalk at Hills Port.
Vitrea crystallina. Ballycarry Ford & Hills Port.
 " *cellaria*. Plentiful, but all dead at Hills Port.
 " *allivaria*. One specimen, var. *viridula*, at Hills Port.
 " *nitidula*. a few at Hills Port.
 " *radiatula*. One specimen at Ballycarry Ford.
 " *pura*. a few at Hills Port.
Arion ater. Ballycarry Ford & Hills Port.
 " *intermedius*. One specimen at Ballycarry Ford.
 " *subfuscus*. One young specimen at Hills Port. R. Welch.
Pyramidula rupestris. Plentiful on chalk debris at Hills Port.
 " *rotundata*. Ballycarry Ford & Hills Port.

Islandmagee cont.

- Hygromia hispida*. Hills Port, Cliff Path & Ballycarry Ford. Common.
Helix aspersa. Common, dead, in holes in chalk at Hills Port.
 " *remoralis*. Common at Hills Port.
Bochlicopa lubrica. Hills Port & Ballycarry Ford. Frequent.
Jamnia cylindracea. Hills Port, common.
Vertigo antivertigo. One specimen at Ballycarry Ford. R. Welch.
 " *pygmaea*. a few at Ballycarry Ford. R. Welch.
Balea perversa. Common with *P. rupestris* at Hills Port. Very large & with exceptionally well formed lip.
Planorbis bidentata. Some fine large specimens at Hills Port with *Balea*.
Succinea elegans. a small form common at Ballycarry Ford.
Barychium minimum. Ballycarry Ford & Hills Port.
Limnaea pereger. Ballycarry Ford & Ditch above Hills Port.
 " *truncatula*. Ballycarry Ford & Hills Port.
Planorbis spirorbis. Plentiful & large in ditch near Ballycarry Ford.
Aplecta hypnorum. Plentiful young with *P. spirorbis* as above.
Paludetrina ventrosa. a few dead in pools at Ballycarry Ford.
 " *stagnalis*. One specimen at Ballycarry Ford.
Cisidium caeruleum. } Both common at Ballycarry Ford and at
 " *personata*. } roadside at Hills Port. [Ver. G.W.S. 1916].

Islandmagee cent.

Hills Port, Black Hd in distance.

Gobbins from Hills Port.

Mill Dam at Harper's Bridge.

2 miles south of City of Belfast Boundary
on Road to Saintfield. 6 Down.

10th Sept. 1905.

Hygrobia hispida
Jamnia cylindracea
Limnaea peregrina
" *palustris*

One dead in Dam.
Common on wall along road at Harper's Bridge.
Common.
Common. All young.

Harper's Bridge, cont.

Limnaea truncatula Common in Flooded parts of dam.
Planorbis cristata Common on duck-weed in dam.
" *contorta* Fairly common.
Physidium personata [Ver. G.W.S. 1916] Common.

4
3
2

Harper's Bridge Dam
looking north-west.
Known locally
as 'Hunter's Mill'.
G.W.S. 1914.

Warrenpoint & Ros Trevor

60 Down 17th Sept. 1905.

Warrenpoint & Rostrevor cont.

- Agriolimax agrestis* a few specimens along Milltown road.
 " *lavis*. Common in swamp on Milltown road.
Vitrea crystallina Milltown road & Water Works, rare.
 " *cellaria* Milltown road, rare.
 " *alliana* Milltown road, rare.
 " *nitidula* Milltown road, rare.
 " *pura* Water Works, rare.
 " *radiatula* Milltown road, common & very fine.
Eucomelus fulvus Milltown road & Water works.
arion ater Milltown road & Water works.
 " *hortensis* One specimen on Milltown road.
Zonitoides nitidus Very common & large at Water Works. Plentiful young.
Punctum pygmaeum One specimen on Milltown road.
Pyramidula rotundata Milltown road, common. also near Rostrevor.
Helicella zaharensis ^{Kobelt.} One immature specimen found alive near Rostrevor. The spot is indicated on map by a small red cross. The specimen was under a stone among nettles in the ruin of a cottage. Feb 1898. Mr. Welch + myself searched this spot carefully on 11th Sept 1905 but found no trace of any colony, indeed it would be a strange place for any *Helicella* to live.
Hygromia hispida Common.
 " *rufescens* Common.
Cochlicopa lubrica. Water Works + on Milltown road.
Jamnia cylindracea Common.
Limax arborum Thunder Hill. rare.

Filiolan

Warrenpoint & Rostrevor cont.

- Vertigo antivertigo* Very common at Water Works.
 " *pygmaea*. Common & large along Milltown road 1 mile from Station.
Balea perversa Near Rostrevor, rare.
Blasilia bidentata 1 young specimen on Milltown road.
Succinea putris Milltown road, a few only young.
 " *elegans* Water Works, mostly dead.
Larychin minimum Common.
Limnaea auricularia Common at Water works. Very fine specimens but all dead.
 " *peregrina* Local.
 " *palustris* Milltown road & water works.
 " *truncatula* rare.
Planorbis fontanus Fairly common, dead, at Water works.
 " *albus* Water works, rare.
 " *spirorbis* Milltown & Water works.
Paludetrina jenkinsi In millions in small stream close to outlet of Moygannon River, Warrenpoint.
Valvata cristata Waterworks, rare.
Ancylus fluviatilis Lhan river, common, young.
Pisidium personatum Common.
 " *milium* Common. } [Ver. G.W.S.
 " *subtruncatum* One spec. } 18-3-16
 " *stusale* One spec }
- Photo. of roadside where *Helicella zaharensis* was found.

Bunbeg continued.

Helicella itala Very common.
 " *barbara* Very common.
Acanthinula aculeata Common in Shell Pockets.
Vallonia pulchella " " " "
 " *costata* " " " "

Also *Pisidium carerianum*.
 " *personatum*.
 " *pulchellum*.
 " *lilljeborgii*.
 " *stusale*.
 from Middleton, and
P. carerianum
P. personatum
 from Clady River.

Helix nemoralis Common. Many white tipped.
 " *aspersa* Very common in dykes. The small wooden crosses in Magheragallon bh. yard were in some cases completely covered with this shell.

Jamnia cylindracea Common
 " *muscorum* Common in Shell Pockets.
Vertigo pygmaea Shell Pockets & alive below Middleton.

" *antivertigo* " " " "
 " *pusilla* Common in shell pockets.
 " *angustior* " " " "
 " *substriata* " " " "

Clausilia bidentata Common.
Larychium minimum Common in suitable places.
Limnaea peregrina In pond below Middleton.
 " *truncatula* Middleton.

Planorbis glaber }
 " *spirorbis* } All three common in pond below Middleton.
 " *crista* }

Pisidium ~~sp.~~ Middleton. See above!

Unio margaritifera Very common in Clady River. All type.

Inishowry, off Carrickfergus.
26th & 27th Sept 1905.

Agriolimax agrestis Common.
Vitrina pellucida common.
Vitrea albisia a dark brown form, common.

Pyramidula rotundata Fairly common

Helicella itala } abundant.
 " *barbara* }

Vallonia costata a good many specimens alive under stones
 " *excentrica* alive with above. Verified by A.W.S. 1924!

Acanthinula aculeata Shell pockets.

Helix nemoralis Rare alive. Plentiful in shell pockets.

Bochliopa lubrica Common.

Clausilia bidentata Fairly common.

Jamnia cylindracea } Common in
 " *muscorum* } Shell pockets.

Vertigo angustior " " "

" *pygmaea* " " "

Lauricularia in semi-decayed
 Case n. of Bunbeg.

Barrickfin Peninsula.
25th 26th + 27th Sept. 1905.

- Agriolimax agrestis* Common.
 " *laevis* Shore of Dunmore Lough.
Vitrea pellucida Frequent.
Vitrea crystallina Very common in shell pockets.
 " *cellaria* " " " " "
 " *alliaria* Common alive & also in shell pockets.
 " *radiatula* A few on shores of Dunmore Lough.
 " *pura* Shell pockets.
Euconulus fulvus Common in shell pockets.
Pyramidula rotundata Common.
Helicella itala } Abundant.
 " *barbara* }
Acanthinula aculeata Common in shell pockets.
Vallonia

Helix nemoralis } Common in old walls & c.
 " *aspersa* }
Bochlicopa lubrica Common.
Gaminia anglica Common in shell pockets.
 " *muscorum* " " " "
 " *cylindracea* Common.
Vertigo pygmaea }
 " *antivertigo* } All very common in shell pockets.
 " *substriata* }

Barrickfin continued.

- Vertigo pusilla* Common in shell pockets.
 " *angustior* " " " "
Sphyradium edentulum " " " "
Clausilia bidentata Frequent. Also in shell pockets.
Succinea elegans Shores of Loughs. all young.
Barychium minimum Shores of Dunmore Lough & also in shell pockets.
Limnaea pereger Common. A beautiful white form, var. *candida*, is very plentiful in Carrnboy Lough. Besides being white these shells are very square shouldered. var. *boissii*.
 " *truncatula* Frequent.
Planorbis glaber Common in Cormac's Lough & Dunmore & Carrnboy Loughs.
 " *crista* One specimen, very large, in Carrnboy Lough.
 " *spirorbis* Dunmore Lough, common.
Acicula lineata Very common in shell pockets.
Cisidium pusillum }
 " *milium* } "Dunmore Lough." [Ver. by G.W.S. 26-3-16]
 " *subtruncatum* }
 " *lilljeborgii* }

Limnaea auricularia Var. *acuta-albida* was found with *pereger* in Carrnboy Lough & verified by J. W. Taylor of Leeds.
 Mullaghderg Lough & Dunes.
 26th + 27th Sept. 1905.

Agriolimax agrestis } Shores of lake
 " *laevis* } common.
Milax sowerbyi A few specimens on shore of lake.
Vitrea pellucida Very common

Mullaghderg continued.

- Vitrea crystallina* Shore of lake & in shell pockets.
" alliaria Shore of lake. common.
" cellaria Shell Pockets, frequent.
Zonitoides nitidus Under stones on shore of lake. Common mostly young.
Euconulus fulvus Common with above on shore of lake.
Arion ater } Common on shore
" subfuscus } of lake.
Pyramidula rotundata. Surprisingly rare.
Helix itala }
" acuta } all very abundant
" nemoralis } on dunes.
" aspersa }
Bochliopa lubrica Common.
Acanthinula aculeata. a few specimens taken under stones on shores of lake without any trace of spines. Common in shell pockets.
Lamnia cylindracea Common.
" muscorum Common in shell pockets.
Vertigo anti-vertigo Very common on shores of lake.
" pygmaea Very common & large with above. Shell pockets.
" substriata a few with above alive. also in shell pockets.
" angustior In abundance in shell pockets, apparently freshly dead.
" pusilla. Fairly common in shell pockets.
Blausilia bidentata. Rare. also in shell pockets.
Succinea elegans Very common with *Vertigo* on shores of lake.
Limnaea pereger common. a few specimens of var. *candida*.
" palustris Common in lake.

Mullaghderg continued.

- Limnaea auricularia* Var. *acuta* fairly common but young. Some also var. *abida*.
Limnaea truncatula Common on shores of lake.
Carychium minimum Common near lake. also in shell pockets.
Planorbis cristata Rare.
" spirorbis Common in flooded parts of lake but is replaced by *glaber* in main portion.
" glaber Very common & large. Feeding on *Potamogeton*.
" contortus Two dead specimens only.
Valvata cristata In abundance & large.
acicula lineata Fairly common in shell pockets.
Pisidium pusillum Common.
" obtusale Fairly common.
" ~~nitidum~~ " "
" gossisianum Rarer than above.
- Verified by " *Pisidium nitidum*.
" pusillum.
" pulchellum.
" subtruncatum.
" laticostatum.
" hibernicum.
 Charles Oldham.
- [Ver. H. A.W.S. 26-3-16]

Dunlewy Lough
 28th Sept. 1905.

- Limax arborum* Common in Dunlewy House woods.
Agriolimax agrestis Common.

Falcarragh

29th Sept. 1905.

Ag	<i>agriolimax agrestis</i>	Common
"	<i>caeris</i>	Fairly common
V	<i>Vitrina pellucida</i>	In sand dunes.
V	<i>Vitrina alliana</i>	a few specimens on sand dunes.
	<i>Eucornutus fulvus</i>	a few specimens.
	<i>anion ater</i>	Common
	<i>hortensis</i>	Common
	<i>Pyramidula rotundata</i>	Common
P	<i>Helicella itala</i>	} abundant.
B	<i>barbara</i>	
H	<i>Vallonia pulchella</i>	Common in shell pockets.
	<i>Helix nemoralis</i>	Common
a	<i>aspersa</i>	Very common.
v	<i>Bochlicopa lubrica</i>	Common
	<i>Jamnia muscorum</i>	Shell pockets.
	<i>cylindracea</i>	Common.
	<i>Vertigo antiveritigo</i>	Under stones
	<i>angustior</i>	Shell pockets
	<i>pygmaea</i>	Under stones with antiveritigo.
	<i>Clausilia bidentata</i>	One young with above.
	<i>Corychium minimum</i>	a few
	<i>Limosa truncatula</i>	In damp spots.

Horn Head

1st & 3rd Oct 1905.

<i>Limax arboum</i>	Common in rubbish around Martello Tower.
<i>agriolimax agrestis</i>	Common.
<i>Vitrina cellaria</i>	Martello Tower, a few only.
<i>alliana</i>	Common with above.
<i>Punctum pygmaea</i>	Shell pockets.
<i>Sphyradium edentulum</i>	Very common under stones by road side to Tower.
<i>Pyramidula rotundata</i>	Common.
<i>Helicella itala</i>	Abundant.
<i>capitata</i>	a large colony around old circus ring opposite Dunfanaghy Br.
<i>barbara</i>	abundant.
<i>Helix nemoralis</i>	Very common. a much weathered but extremely heavy type is to be found alive on Tramore dunes.
<i>aspersa</i>	Common.
<i>Bochlicopa lubrica</i>	Common
<i>Jamnia cylindracea</i>	Common. Very large & very thin shells.
<i>muscorum</i>	Shell pockets.
<i>Bucca perversa</i>	In abundance with well formed lips in mortar on Martello Tower.
<i>Clausilia bidentata</i>	Frequent.
<i>Vitrina pellucida</i>	Common in dunes.
<i>Fontoides nitida</i>	Very common near Dunfanaghy Bridge in small marsh.
<i>Eucornutus fulvus</i>	Common
<i>Vallonia pulchella</i>	Common near lime kiln near Bridge. (prob. expectation M.H.)
<i>costata</i>	Very common with above. Fine specimens.
<i>Vertigo antiveritigo</i>	alive in marsh near bridge. common.
<i>pygmaea</i>	With above but not so common.

Horn Head continued.

ag	<i>Vertigo substriata.</i>	Shell pockets
	" <i>pusilla.</i>	Shell pockets
	" <i>angustior.</i>	Shell pockets.
v	<i>Succinea elegans.</i>	Common in marsh near bridge.
v	<i>Limnaea pereger.</i>	Very fine specimens in marsh.
	<i>truncatula</i>	with above.
	<i>Brachium minimum.</i>	Common in shell pockets.
	<i>acicula lineata.</i>	Common in shell pockets.

Sessiagh Lough & district.
4th Oct 1905.

B	<i>Limax urbanus.</i>	On shores of lake.
H	<i>Agriolimax agrestis.</i>	Common.
	" <i>levis.</i>	Frequent.
a	<i>Vitrea pellucida.</i>	Common.
2	<i>Vitrea alliana.</i>	Common.
	" <i>radiatula.</i>	A few specimens.
	<i>Zonitoides nitidus.</i>	Very common on shore of Sessiagh Lough near road.
	<i>Euconulus fulvus.</i>	Common.
	<i>Arion ater.</i>	Common.
	" <i>hortensis.</i>	A few.
	" <i>intermedius.</i>	A few specimens only along cliffs to West of lake.
	<i>Pyramidula rotundata.</i>	Common.
	<i>Helicella itala.</i>	Abundant on shore
	" <i>barbara.</i>	near Rockhill.
	<i>Pygmaea hispida.</i>	One specimen with <i>a. minus</i> in nettles.

Primary Limestone.

Sessiagh Lough continued.

	<i>Helix nemoralis.</i>	Plentiful but young.
	<i>Bohliopa cubica.</i>	Common
	<i>Gemma cylindracea.</i>	Common
	<i>Vertigo antiverigo.</i>	Very common
	" <i>pygmaea.</i>	Common.
	<i>Planorbis bidentata.</i>	A few only.
	<i>Succinea elegans.</i>	Abundant on shores of Lake.
	<i>Limnaea pereger.</i>	Common
	" <i>truncatula.</i>	Common
	<i>Planorbis glaber.</i>	A few in lake.
	<i>Valvata cristata.</i>	Plentiful in outlet of Kill Lough.
	" <i>piscinalis.</i>	One young in Sessiagh Lough.
	<i>Cisidium pusillum.</i>	Outlet of Kill Lough. [Ver. by A.W.S. 26-3-16]

Glenveagh
30th Sept. 1905.

Glenveagh continued.

<i>Limax maximus</i>	A few in Mullagore Wood.
" <i>arborum</i> .	Common.
<i>Agriolimax agrestis</i> .	Common.
" <i>laevis</i> .	A few.
<i>Milax sowleyi</i> .	Rare only two seen.
<i>Vitrea pellucida</i>	Common.
<i>Vitrea crystallina</i> .	Not at all common.
" <i>pura</i> .	Very common.
" <i>radiatula</i>	Frequent.
" <i>nitidula</i>	Common.
" <i>alliana</i> .	Common.
<i>Zonitoides excavatus</i>	One var. <i>viridula</i> in wood.
<i>Euconulus fulvus</i> .	Fairly common.
<i>unio ater</i> .	Common. Very pale var.
" <i>hortensis</i> .	Common.
" <i>subfuscus</i> .	Abundant. Mostly young.
<i>Physadnum edentatum</i>	In woods.
<i>Pyramidula rotundata</i>	Common.
<i>Helix nemoralis</i> .	A very fragile variety living in moss under trees.
<i>Hygromia fusca</i> .	Very common. Mostly young.
<i>Acathina lamellata</i> .	One fine specimen in Mullagore wood.
<i>Bohliops lubrica</i> .	Common.
<i>Gemma anglica</i> .	Fairly common on moss.
" <i>cylindracea</i> .	Common.
<i>Cassia perversa</i> .	Common.
<i>Gilia bidentata</i>	Common.

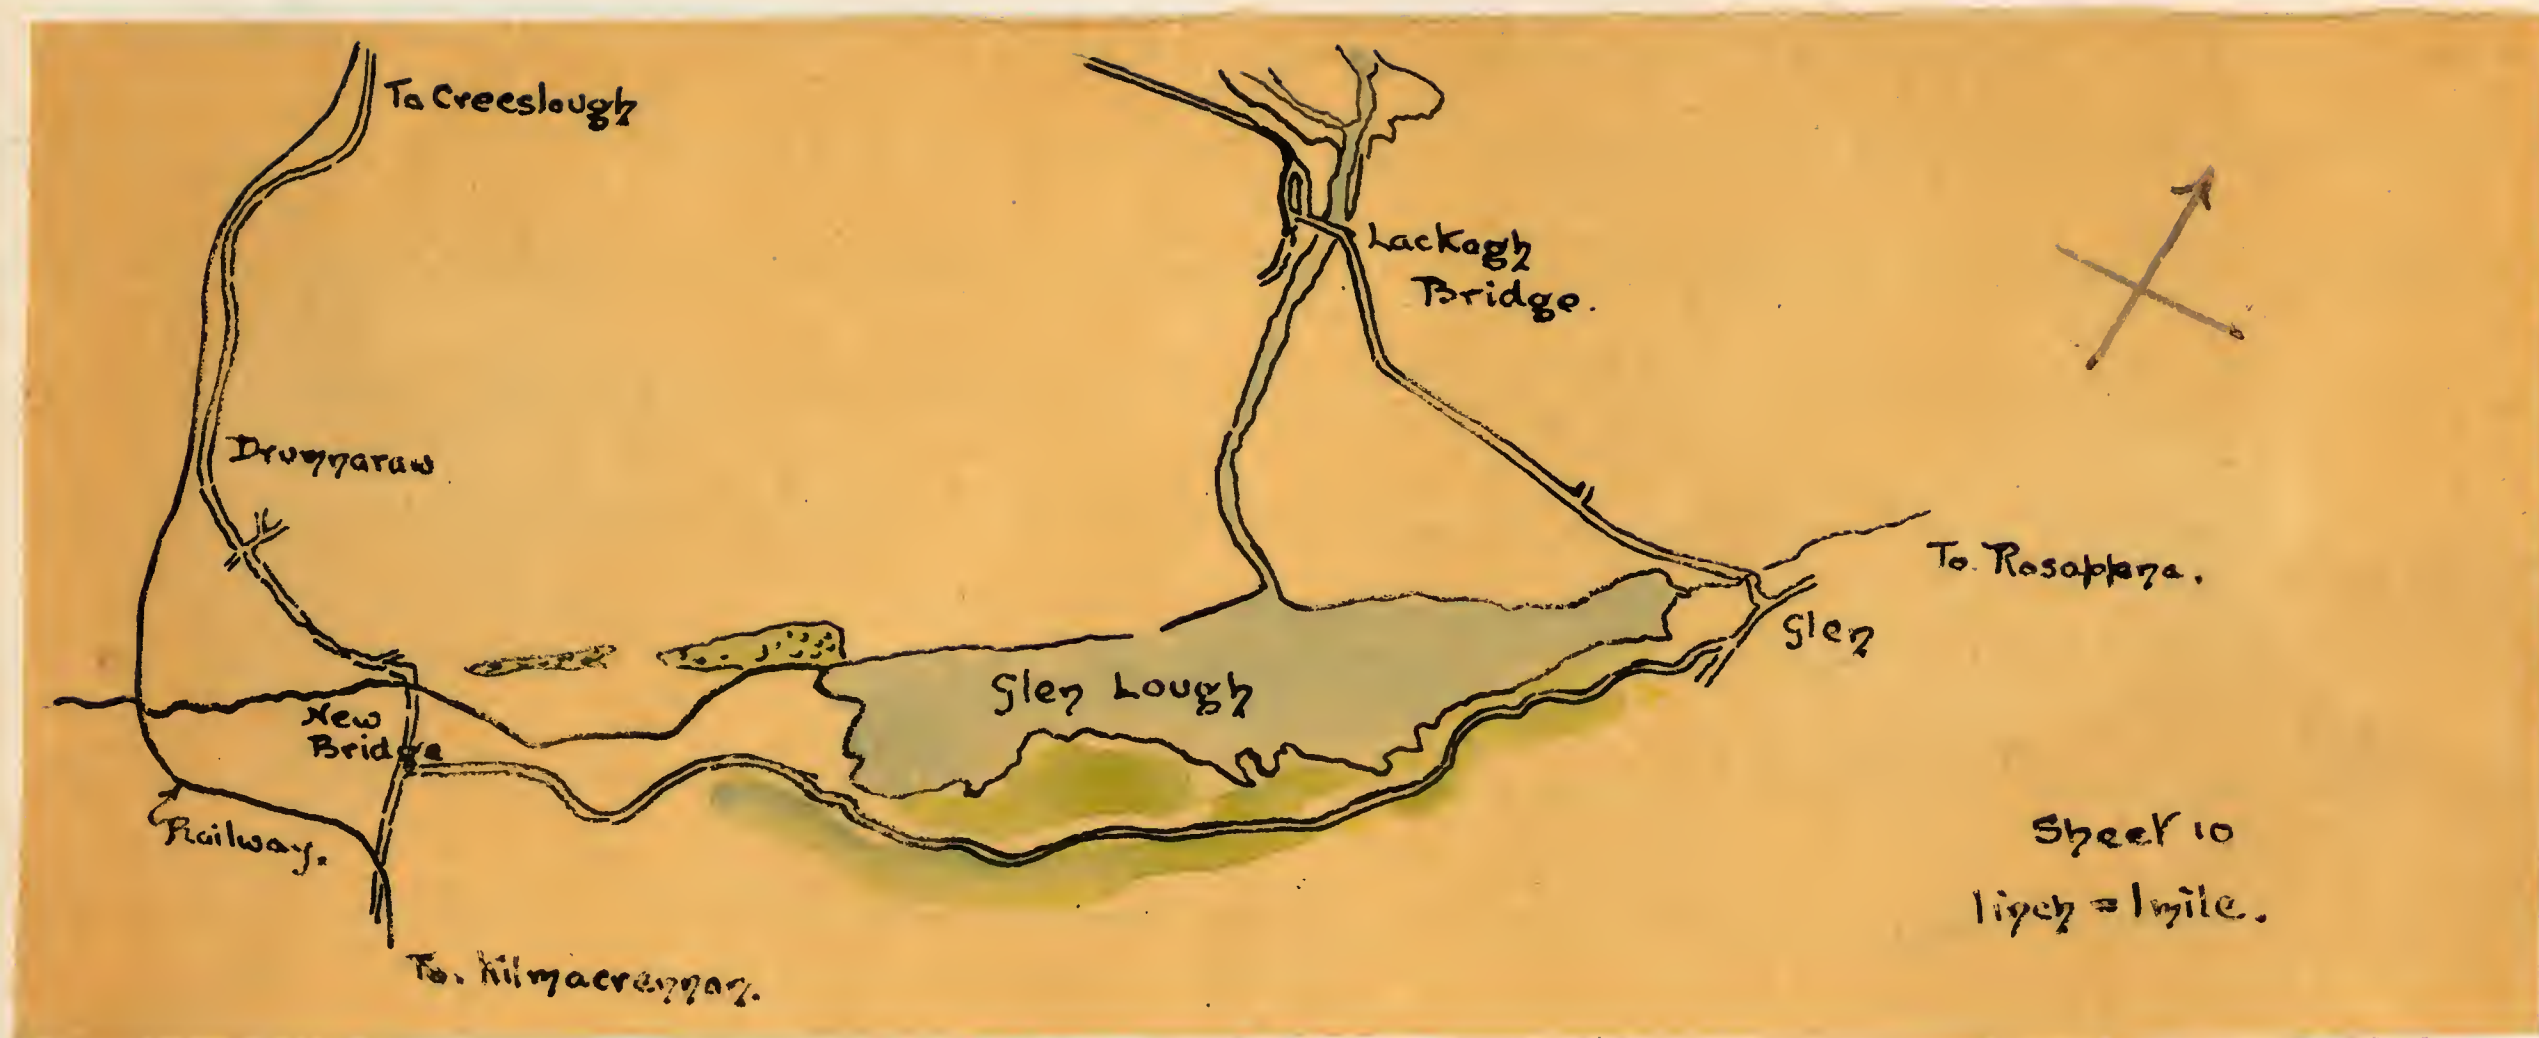

Glenveagh? continued.

<i>Carychium minimum</i>	A few seen.
<i>Limnaea truncatula</i>	One specimen on shore of lake.
" <i>peregr.</i>	Common.

Glen Lough 5th Oct 1905.

<i>Limax arborum</i> .	Plentiful.
<i>Agriolimax agrestis</i>	Common.
" <i>laevis</i> .	Frequent.
<i>Vitrea pellucida</i>	Common.
<i>Vitrea crystallina</i> .	Rare.
" <i>pura</i> .	Common.
" <i>radiatula</i> .	A few.
" <i>nitidula</i> .	Common.
" <i>alliana</i> .	Common. One specimen of var. <i>viridula</i> .
<i>Zonitoides nitida</i> .	A few only.
<i>unio ater</i> .	Common.
<i>Pyramidula rotundata</i> .	Common.
<i>Gemma cylindracea</i>	Very common.
<i>Helix nemoralis</i> .	One specimen like those from Glenveagh.
<i>Vertigo antiverugo</i>	All three under stones by roadside north of New Bridge.
" <i>substriata</i>	
" <i>pygmaea</i> .	

Glen Lough continued.

A few white specimens on top in woods.

Dead.

Dead at Betchworth.

One alive on Sutton station.

Dead.

Dead. Several at Betchworth.

Fairly common.

One young dead above Betchworth. We could not find any alive where there were hundreds in June. They had evidently burrowed in the soft chalk as there had been slight signs of foot a day or so before our visit.

Vertigo pygmaea.

A few under flints on the Pilgrim's Way above Burford Bridge. Normal & large. 4 teeth &

Fairly plentiful with last under flints.

Pupa muscorum.

Glansia fidentata

Very abundant on an old brick wall in Betchworth.

Eva obscura

Living at roots of grass & upon the ledges at Betchworth. Several pure white specimens.

Loch. lubrica.

A few. Two pure white on summit of hill in woods common.

Carychium min.

Bacillaria acicula.

A few dead under grass & moss above Burford Bridge.

Cyclotoma elegans.

In millions on ledge bank at Betchworth.

Limox arborea.

One on trees. Young.

Arion minimus.

Common.

" *hortensis*.

Very abundant in the old woods & the only mollusc seen alive in the denser portion.

Box Hill continued.

Limnaea peregrina
 " *truncatula*
 " *palustris*
Planorbis coriacea
 " *contorta*
 " *spirorbis*
Pisidium nile

A small form not sharply keeled.

(158) *Murina* *brachy* correct.
 See Vol. p.

Acton Wood near Poyntypass, Co. Armagh.
 Aug. 20. 6. 09.

Arion ater

" *hortensis*

Vitrea pellucida. Dead.

Vitrea nitidula

" *allium* Type common alive.

" *pura* Young alive. Full grown dead shells common.

" *radiatula* Rare.

" *crystallina*

Eucornutus fulvus

Helix rotundata

" *renacilis*

" *aspersa*

Cochlicopa lubrica

Physa edentata

Purpura anglica

" *cyllindracea*

& *Glacilia bidentata*.

Small lake near Farna - Co. Armagh.

Aug. 20. 6. 09.

Limnaea peregrina

" *palustris*

Succinea papyracea

Physa fontinalis

Planorbis coriacea

Very abundant.

Valvata cristata

" *piscinalis*

Bythia tentaculata

Sphaerium concum

Pisidium nile

(159)

Canal tanks from Poyntypass to Lymington Bridge
 near Portadown - Co. Armagh.

Aug. 20. 6. 09.

Agriolimax agrestis

Limax ater

Lymington Bridge

" *naevius*

" "

Arion ater

" *suffusus*

" *fuscus*

Lymington Bridge.

Vitrea pellucida

Dead.

Vitrea litoralis

Lymington Bridge

" *crystallina*

" *nitidula*

Helix rotundata

Barrel near Portadown continued.

- Helix lipida*
 " *renovata* several white tipped. One near Larn very like *H. lentiginosa*.
 " *aspera*
Bohliopa tubica
Blasilia bidentata
Pupa cylindracea
Succinea putan One near O'neil's Bridge. Very pale amber colour.
 " *psiffensis* O'neil's Bridge
Physa fontinalis
Limnaea peregrina
 " *stagnalis*
 " *pulchra*
Planorbis contorta
 " *carinata*
Bythinia tentaculata
Valvata ovata
Sphaerium cornu
Pisidium amicum One dead valve - took at Larn Junction.
 " *nili*
 " *fontinalis*
 " *psiffensis*

(160)

Larn Junction, Co. Lerry.

Aug. & Feb. 03. 26.6.09.

- Limnaea* near
agris. agrestis
aurum. atrum
 " *suffusa*
Vitrina pellucida Dead.
Vitrina nitidula Dead.
Helix lipida
 " *itala* Young near station.
 " *aspera*
Bohliopa tubica
Planorbis spirorbis
Succinea psiffensis
Limnaea peregrina
 " *truncatula*
Paludestronia jenkinsi Swarming everywhere
 " *stagnalis* a very small form like *P. ventrosa*.
Physa stagnalis Also its var. *P. denticulata* along sea dyke.
Aplecta hypnorum

NB. J. N. Milne tells me that *Aplecta hypnorum*, *Planorbis creta*
 + *Pl. spirorbis* used to be extremely common -
 there was before the appearance of *Pal. jenkinsi*.
Pl. creta has now entirely disappeared & the other
 two sp. are very rare.

Aug. 26. 6.09.

Malworth Woods, Co. Derry.

Aug. 26-6-09.

Species ranked J. N. M. have been taken here by Mr. J. N. Milne
& verified by Dr. Schaeffer.
